

Community Spotlight

At Jericho Security, we understand that our success is a direct result of the valuable contributions made by our partners, advisors, customers, employees, and investors. To recognize and appreciate the outstanding members of our community who have played a vital role in helping us achieve our goals, we highlight them in our Community Spotlight.

Scott Howitt
Jericho Security CISO Advisor

Chief Digital Officer, UKG

What specifically caught your attention about Jericho Security that motivated you to consider joining our community?

Phishing continues to be the primary gateway for cybercriminals to gain unauthorized access to sensitive information. Jericho has developed a unique approach to tackle cyber attacks by employing AI-driven simulations and training that replicate spear-phishing scenarios in real life. Jericho Security tracks team performance and progress, identifying trends and high-risk activities across the entire company. This enables organizations to enhance their readiness and safeguard themselves against the constantly changing threat landscape.

Would you share any exceptional experiences working with Jericho Security?

I am impressed with the Jericho team's capability to deliver new features quickly. Additionally, Jericho can create new customer training videos in just 24 hours, which allows companies to promptly respond to the challenges they face and train their employees to identify them.

What would you say to prospects, partners, or advisors considering partnering with Jericho Security?

If you are looking to improve your AI-based training and phishing campaigns, Jericho is the right choice.

How would you summarize Jericho Security in one sentence?

The new standard in Phishing Simulations and Education.

Let's learn something personal about you! What do you collect?

Frequent flyer miles! I enjoy spending time on the trail and I love spending time with friends and family.

About Jericho Security

Jericho is using AI to fight AI. With unparalleled expertise in proprietary analytics and educational frameworks, we build our defenses to withstand the relentless scale and might of AI-unleashed attacks.
